HEADACHES

The common headache, whether it is a "hang-over" type or merely "the morning after" type, does not come from the brain itself but from tiny blood vessels going into the brain. The headache is caused by "tides" in the fluid carried by these vessels to the brain. When these blood vessels are stretched, a headache results. These blood vessels are said to be the only structures connected with the brain that can register pain. Various drugs for relieving headaches are said to affect temporarily the volume of fluid going to the brain in these blood vessels. Cold applied to the forehead diminishes the flow somewhat and thus feels pleasant to people with headaches. This "tide" theory was announced first by Dr. Temple Fay of Philadelphia.

Where you can see Community Price Lists.

1. Wartime law requires that all food lists be posted where customers can see them in every store that sells food.

2. They are posted in your War Price and Rationing Board.

How you should use Community Price Lists:

1. Compare the prices you pay with the official prices on the list. Never Pay More.

2. In a friendly way, call your merchant's attention to any overcharges. He will probably want to correct them.

3. If the merchant insists on selling at prices higher than those on the Community Price List, he is violating a war time law. Report such violations to the Price Panel of your War Price and Rationing Board.

On November 15th a letter was addressed to each employer in the Virginia District in order to remind them that a receipt must be given to each employee before January 31, 1944, and a copy of the receipt must be filed with the Collector.

A great many employers think they have to give separate receipts for the Victory Tax and for the Income Tax; the collector said. He emphasized, however, that only one receipt is required, showing the total of the two taxes.
